

## A Conversation with Dr. Aaron Drucker

### Educational Resource Developer

### Aaron Drucker, MD, ScM, FRCPC

Dermatologist and Scientist at Women's College Hospital  
Associate Professor at University of Toronto

#### ***Why did you get involved with CSPA?***

As a scientist focused on evidence-based medicine, I am aware that there is a lot of misinformation out there about skin diseases and their treatments. By helping to create educational materials for people with skin conditions, I can help ensure people are well-informed about their condition and treatment options.

#### ***Why do you like volunteering with CSPA?***

It is rewarding to know that content I help develop will benefit people with skin conditions directly.

CSPA has also helped connect me with people with lived experience with skin conditions to work with me as research partners. They help make my research more patient-centred.

#### ***Why would you tell others that they should get involved with CSPA?***

It is a great organization that has the best interests of the skin disease community at heart.

#### ***Has a personal connection with the skin patient community inspired your participation?***

As a dermatologist, I try to help many people manage their skin conditions. CSPA lets me take that to another level, helping the wider skin patient community.
